

****Assignment 1: Basic Navigation and Directory Operations****

1. Open a terminal and navigate to your home directory using the ``cd`` command.
2. Create a new directory called "Assignment1" using the ``mkdir`` command.
3. Move into the "Assignment1" directory using ``cd``.
4. Create a subdirectory called "FolderA" within "Assignment1" using ``mkdir``.
5. Use the ``pwd`` command to display your current working directory.
6. Create an empty text file named "file1.txt" inside "FolderA" using the ``touch`` command.
7. Display the contents of "file1.txt" using ``cat``.
8. Return to your home directory using ``cd``.
9. Use ``rmdir`` to remove the "FolderA" directory (it should be empty).
10. Confirm that "FolderA" has been removed.

****Assignment 2: File Creation and Deletion****

1. Navigate to your home directory using ``cd``.
2. Create a new directory called "Assignment2" using ``mkdir``.
3. Move into the "Assignment2" directory using ``cd``.
4. Create a subdirectory called "FolderB" using ``mkdir``.
5. Create a text file named "document.txt" inside "FolderB" using ``touch``.
6. Use ``pwd`` to confirm your location.
7. Delete the "document.txt" file using ``rm``.
8. Attempt to remove "FolderB" using ``rmdir``. Note and explain the error message.
9. Remove "FolderB" and its contents using ``rm -rf``.
10. Verify that "FolderB" has been deleted.

****Assignment 3: Working with Relative Paths****

1. Navigate to your home directory using ``cd``.
2. Create a directory called "Assignment3" using ``mkdir``.
3. Move into "Assignment3" using ``cd``.
4. Create a subdirectory called "FolderC" using ``mkdir``.
5. Move back to your home directory using a relative path.
6. Use ``cd`` with a relative path to navigate to "Assignment3/FolderC."
7. Display your current location with ``pwd``.
8. Create a text file named "notes.txt" in "FolderC" using ``touch``.
9. Confirm the presence of "notes.txt" using ``ls``.
10. Use ``cat`` to view the contents of "notes.txt."

****Assignment 4: Manipulating Files and Directories****

1. Navigate to your home directory using ``cd``.
2. Create a directory called "Assignment4" using ``mkdir``.
3. Move into "Assignment4" using ``cd``.
4. Create subdirectories "FolderD" and "FolderE" using ``mkdir``.
5. Create text files "file2.txt" in "FolderD" and "file3.txt" in "FolderE" using ``touch``.
6. List the contents of "FolderD" and "FolderE" using ``ls``.
7. Use ``rm`` to delete "file2.txt" and "file3.txt."
8. Confirm the deletion of the files.
9. Remove "FolderD" and "FolderE" using ``rmdir``.
10. Verify that "FolderD" and "FolderE" have been removed.

****Assignment 5: Clean Up with Absolute Paths****

1. Navigate to any directory within your home directory using ``cd``.
2. Create a new directory called "Assignment5" using ``mkdir``.
3. Move into "Assignment5" using ``cd``.
4. Create a subdirectory called "FolderF" using ``mkdir``.
5. Create a text file named "important.txt" in "FolderF" using ``touch``.
6. Use an absolute path to delete "important.txt" from any location.
7. Verify that "important.txt" has been deleted.
8. Navigate to your home directory using ``cd``.
9. Remove "Assignment5" and its contents using ``rm -rf`` with an absolute path.
10. Confirm that "Assignment5" and its contents have been removed.
